Pruebas de formulas

$$2 + 2 = 4$$

$$\frac{2}{3}$$

$$\frac{2^3}{4}$$

$$\sum_{i=0}^n$$

Esta es una prueba de **resaltar** una palabra.

$$\sqrt[3]{6}$$

La $\sqrt[2]{4}$ es 2

$$\begin{pmatrix} a_{11} & a_{12} & a_{13} \\ a_{21} & a_{22} & a_{23} \end{pmatrix}$$

$$\begin{bmatrix} a_{11} & a_{12} & a_{13} \\ a_{21} & a_{22} & a_{23} \end{bmatrix}$$

$$\begin{Bmatrix} a_{11} & a_{12} & a_{13} \\ a_{21} & a_{22} & a_{23} \end{Bmatrix}$$

Ejemplos de Chunks

Vamos a calcular la $\sqrt{2} - e^{-2}$:

[1] -5.974843

	[,1]	[,2]	[,3]	[,4]	[,5]	[,6]
[1,]	7	6	35	34	15	14
[2,]	8	5	33	36	16	13
[3,]	27	26	19	18	11	10
[4,]	25	28	20	17	9	12
[5,]	23	22	3	2	31	30
[6,]	21	24	1	4	29	32
